کاروبار کا مجموعی جائزہ

کاروباری اور مالیاتی طور پر سال کے دوران سخت تپڑوں کے باوجود کمپنی کے مالیاتی سال 2016 کا اختتام روشن رہا۔ Archroma کر سکتے ہیں اور جوابدہی کی سوچ کے ساتھ مثبت سمت، اختراع کرنے یعنی سال گزشتہ کے مقابلے میں نمو کے لیے کوشاں رہی اور کامیابی سے چیلنجز سے نمٹا گیا۔

ہم مستقل طور پر اسٹیٹس کو کوچیلنج کرتے رہے اس گہرے یقین کے ساتھ کہ ہم اپنی انڈسٹری کو پائیدار بنا سکتے ہیں۔ ہم نے اپنے ہر قدم پر ایکسیلنس کو برقرار رکھا، جس نے ہمیں ان مسابقت کاروں سے ممتاز کیا جو ہماری انڈسٹری کو آگے بڑھانے کے لیے مختلف نگاہ کے حامل ہیں۔ Archroma کا ”ون وے“ تصور یہ امتیاز پیدا کرنے کی بہترین مثال ہے، جو انڈسٹری کو پائیداریت کی طرف لے جا رہا ہے۔

زیر جائزہ پیریڈ کے دوران ہم نے رسک مینجمنٹ کے پیرامیٹرز پر گہری نگاہ رکھی، لاگت پر قابو رکھا، نیٹ ورکنگ سرمائے اور پورٹ فولیو کی اصلاح پر محتاط کنٹرول رکھا، جس سے Archroma کو تمام کاروباری معاملات میں برتری حاصل ہوئی اور مارکیٹ شیئر میں اضافے سے لطف اندوز ہو رہی ہے۔ Archroma نے اسی جوش کے ساتھ شاندار کارکردگی کا ٹریک ریکارڈ برقرار رکھا ہوا ہے جس کے نتیجے میں آپریٹنگ رزلٹ پر مثبت اثر مرتب ہو رہا ہے اور یہ اس حقیقت کا ثبوت ہے کہ کمپنی نے زیر جائزہ سال کے دوران 10 بلین روپے کی سیلز کا شاندار سنگ میل عبور کر کے بڑا کارنامہ انجام دیا۔

پائیداریت کے اہداف اور اختراعیت کے ساتھ ہم اپنے راستے پر رواں دواں ہیں اور منظر نامہ نہایت مستحکم دکھائی دے رہا ہے۔ ہم نے اپنے آغاز سے اپنی کارکردگی کے ذریعے ایک طویل سفر طے کیا ہے اور انڈسٹری کے ہر رخ پر قائد بن کر ابھرے ہیں۔

انتظامیہ پیش آمدہ چیلنجز کے لیے مستعد اور مستقل طور پر حکمت عملیاں تیار کر رہی ہے اور مارکیٹ رسک کو کم سے کم کرنے کے لیے مناسب اقدامات اٹھا رہی ہے، کاروبار کی ترقی برقرار رکھنے کے لیے مستقبل کے چیلنجز پر پورا اتر رہی ہے۔ مزید برآں، کمرشل ایکسیلنس پروگرام تیار کیا گیا ہے جو اگلے سال شروع ہوگا جو بڑی کامیابیاں لائے گا، ہماری گنجائش کو پائیدار سطح پر بڑھاتے ہوئے مارکیٹ میں فرق لانے میں مددگار ہوگا۔ لاگت قابو میں رکھنا، منظم آپریشنز اور مسلسل جدت کاری اور اپ گریڈنگ آپ کی کمپنی کی کاروباری حکمت عملی کے لیے کلیدی اجزا ہیں جن کی وجہ سے اسٹیک ہولڈرز کو اچھا منافع پہنچتا ہے۔

آئیں، Archroma کے ورک کچر 'ACTS' رویوں کے ہمارے چار ستونوں پر مشتمل سفر کو جاری رکھیں جو بتاتے ہیں کہ کس طرح کمپنی میں ہر شخص ہر وقت پائیدار ویلویو کی پیداوار میں اپنا حصہ ادا کر سکتا ہے۔

سیلز

Archroma ان کیمیکل کمپنیوں میں سے ایک ہے جنہوں نے ٹھوس ترقی کے ساتھ برسوں میں ٹاپ لائن میں بندرتن قوت کا مظاہرہ کیا۔ ہماری کمپنی نے اسے اپنے تمام کاروباری حصوں کی شراکت کے ذریعے ممکن بنایا اور کسٹمرز کے لیے قدر پیدا کرنے کے لیے ٹیکنیکل اور کمرشل مہارتوں کے ساتھ ساتھ فروخت کرنے کی بہترین صلاحیت استعمال کی۔ سال 2016 کے لیے کمپنی کی سیلز 12,474 ملین روپے رہی۔ سال گزشتہ کے مقابلے میں سیلز میں 6 فیصد اضافہ ہوا۔ ہماری ذیلی کمپنی (ATCPPL) کی گزشتہ پورے سال میں کی گئی اصل سیلز کو مد نظر رکھتے ہوئے مندرجہ بالا بڑھوتری کا حساب لگایا گیا ہے۔ تاہم، ہمارے مالیاتی گوشوارے میں جو اعداد درج ہیں وہ تکنیکی سبب سے ذیلی کمپنی کے گزشتہ سال کی صرف دو ماہ کی سیلز پر مشتمل ہیں۔

منافع کی مد بندی

کمپنی کے منافع کی مجوزہ مد بندی مندرجہ ذیل کے تحت ہے:

2,047	مجوزہ 600 فیصد حتمی نقد ڈیوڈنڈ
1	سالانہ اجلاس عام میں منظوری کے بعد واجب الادا
	غیر مد بند منافع آگے لایا گیا

ہمارے حصص یافتگان کی ترجیح مد نظر رکھتے ہوئے، بورڈ نے حتمی نقد ڈیوڈنڈ @ 600 فیصد کی تجویز پیش کی ہے یعنی مالی سال ختمہ 30 ستمبر 2016 کے لیے فی حصہ 60 روپے۔ یہ سوچ حصص یافتگان کو تسلسل کے ساتھ پائیدار ویلیو کی واپسی کے ہمارے عزم کے عین مطابق ہے۔

حصص کی قیمت

کمپنی کا شیئر سال کے دوران پاکستان اسٹاک ایکسچینج کے ریڈی بورڈ حوالوں کے مطابق بلند ترین سطح پر 610.00 روپے اور پست ترین سطح پر 390.00 روپے رہی۔

ہم نے جام شورو میں صاف پانی کی ایک سپلائی لائن نصب کی ہے جس کے ذریعے ہم آس پاس کے علاقے کو روزانہ تقریباً 540,000 لیٹر پانی فراہم کرتے ہیں جس پر کمپنی کافی مالی سال تقریباً 2.7 ملین روپے خرچ آتا ہے۔ ہماری جامشور سائٹ کے علاقے میں واقع گاؤں کے باشندوں کو ہمارے سپوری فلیکشن پلانٹ سے پینے کا صاف پانی فراہم کیا جاتا ہے۔

عطیات

ہماری کمپنی مختلف سماجی، طبی اور تعلیمی اداروں کو 1.00 ملین روپے کی رقم عطیہ کر چکی ہے۔ متعدد میڈیکل سینٹرز کے ساتھ تعاون کے لیے خون کے عطیے کی مہمات کے ذریعے ملازمین میں رضا کارانہ جذبے کی حوصلہ افزائی کی گئی۔

سسٹین ایبل ایفلوینٹ ٹریٹمنٹ (SET) پلانٹ (صفر مائع اخراج)

اس کے ذریعے 80 فیصد گنداپانی ری سائیکل ہوتا ہے جس کے نتیجے میں دریائے سندھ سے پانی کے حصول میں زبردستی کمی آجاتی ہے۔ مئی 2012 میں 375 ملین روپے کی سرمایہ کاری کے ساتھ نصب کیا گیا تھا جو کہ علاقے میں پانی کے تحفظ کے لیے نمایاں خدمت ہے۔

Biosynthetic dyes - in a nutshell

Sustainability is a key motivating factor in technological innovations available to textile mills and brand owners and a demand for more eco-conscious fashion is impacting developments in the textile chemicals business. At Archroma we are dedicated to developing the latest technologies to deliver fashion trends in the most sustainable ways possible. With the introduction of EARTHCOLORS, Archroma has provided the possibility to choose the fashion with the least environmental impact.

EARTHCOLORS are based on a range of biosynthetic dyes for cotton and cellulose based fabrics. The rich red, brown and green colours for denim and casual wear are derived from agricultural waste products like almond shells, saw palmetto, rosemary leaves and other natural products that would otherwise have been sent to landfills. In this transformation of biomass from waste products of the agriculture, not a single square meter of land is set aside to growing the raw material for these dyes, so there is no competition for arable land.

EARTHCOLORS (EC) equal the fixation rate, fastness and overall performance of existing range of Sulphur Dyes made from conventional petroleum based raw materials. This new development is a 'step-change' in coloration and synthetic dye technology. As the origin of these dyes is classed as a natural polymer, EC products are compliant with European REACH requirements.

/ EARTHCOLORS BY ARCHROMA

Consumers are also asking for transparency and traceability of products used in clothing. Thanks to smart Near Field Communications (NFC) technology, EARTHCOLORS dyes are fully traceable - from natural waste material to store. Every garment coloured with EC has a hang tag incorporated with a chip. Information stored on this unique chip is drawn from a database managed by Archroma and can contain information such as the mill which dyed the fabric, where the garment was laundered, as well as the source of bio-based raw material; thus representing a true link from origin of the biomass through to the final garment. Information for this chip can be accessed by the prospective buyer in the shop using NFC technology through their Smart Phone.

The beauty of this concept is its full integration in the supply chain and strong partnership between the brand, textile mills and Archroma, which allows them to work together from the start of a new collection with full traceability and greater efficiency. Calculations based on the dye recipes and the brand's garment collections enable the quantity of biosynthetic dyestuff used to be tightly controlled as well as the number of NFC labels for the correct product authenticity and traceability.

The combination of sustainability, supply chain transparency, garment traceability, and ease of application at the mills combine to make EARTHCOLORS one of the textile industry's most exciting recent developments.

Review Report to the Members on the Statement of Compliance with the Code of Corporate Governance

We have reviewed the enclosed Statement of Compliance with the best practices contained in the Code of Corporate Governance ("the Code") prepared by the Board of Directors of **Archroma Pakistan Limited** ("the Company") for the year ended 30 September 2016 to comply with the requirements of Listing Regulation No. 5.19.24 of the Rule Book of Pakistan Stock Exchange where the Company is listed.

The responsibility for compliance with the Code is that of the Board of Directors of the Company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the Company's compliance with the provisions of the Code and report if it does not and to highlight any non-compliance with the requirements of the Code. A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Code.

As part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Directors' statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

The Code requires the Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval its related party transactions distinguishing between transactions carried out on terms equivalent to those that prevail in arm's length transactions and transactions which are not executed at arm's length price and recording proper justification for using such alternate pricing mechanism. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the Company's compliance, in all material respects, with the best practices contained in the Code as applicable to the Company for the year ended 30 September 2016.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented except as disclosed in note 3.

4.1 Property, plant and equipment

4.1.1 Operating fixed assets

Owned assets

These are stated at cost less accumulated depreciation and accumulated impairment losses, if any, except freehold land and capital work-in-progress which are stated at cost less accumulated impairment losses, if any. Whereas, cost includes expenditures that are directly attributable to the acquisition of the assets. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation is charged using the straight line method, whereby the depreciable amount of an asset is written off over its estimated useful life. The cost of leasehold land is amortised equally over the lease period. The asset's residual values and useful lives are reviewed, and adjusted if required, at each balance sheet date.

Depreciation is charged on additions from the month the asset is available for use and on disposals up to the month preceding the month of disposal. The rates of depreciation are stated in respective note in these financial statements.

Subsequent costs are included in the asset's carrying amounts or recognised as a separate asset, as appropriate, only when it is probable that future benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit and loss account as and when incurred.

Gains / losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the profit and loss account in the year in which they arise.

Leased assets

Upon initial recognition, an asset acquired by way of finance lease is stated at an amount equal to the lower of its fair value and the present value of minimum lease payments, each determined at the inception of the lease. Subsequent to initial recognition, the asset is stated at the amount determined at initial recognition less accumulated depreciation and impairment losses, if any.

Depreciation is charged on the same basis as used for owned assets.

4.1.2 Capital work-in-progress

All expenditure connected with specific assets incurred during installation and construction period are carried under capital work in progress at cost. These are transferred to specific assets as and when these are available for use.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4.1.3 Impairment

The Company assesses at each balance sheet date whether there is objective evidence that property, plant and equipment may be impaired. If any such indication exists, the recoverable amount is estimated which is the greater of its value in use and its fair value less cost to sell. An impairment loss is recognised, if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in profit and loss account.

4.1.4 Borrowing costs

Borrowing costs are recognised as an expense in the period in which these are incurred except in cases where such costs are directly attributable to the acquisition, construction or production of a qualifying asset (one that takes substantial period of time to get ready for use or sale) in which case such costs are capitalised as part of the cost of that asset.

4.2 Loans, advances and deposits

These are stated at cost less estimates made for any doubtful receivables based on a review of all outstanding amounts at the balance sheet date. Balances considered bad and irrecoverable are written off when identified.

4.3 Stores and spares

Stores and spares are valued at the lower of cost determined on the moving average method and net realisable value. Cost in respect of items in transit includes the invoice values and other charges incurred thereon.

Provision for obsolete and slow moving stores and spares is determined based on the management's assessment regarding their future usability.

Net realisable value signifies the estimated selling price in the ordinary course of business less the estimated cost of completion and estimated costs necessarily to be incurred to make the sale.

4.4 Stock-in-trade

Stock-in-trade are valued at the lower of cost determined on the moving average method and net realisable value.

Cost of work-in-process and manufactured finished goods comprises cost of direct materials, direct labour and an appropriate portion of production overheads. Cost in respect of items in transit includes the invoice values and other charges incurred thereon.

Provision for obsolete and slow moving inventories is determined based on management's assessment regarding their future usability.

Net realisable value signifies the estimated selling price in the ordinary course of business less the estimated cost of completion and estimated costs necessarily to be incurred to make the sale.

4.5 Trade and other receivables

Trade and other receivables are carried at original invoice amount less an estimate for doubtful balances which is determined based on review of outstanding amounts and previous repayment patterns. Balances considered bad and irrecoverable are written off when identified.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4.6 Taxation

Current

Provision for current taxation is based on taxable income at the current rates of taxation after taking into account applicable tax credits, rebates and exemptions available, if any and taxes paid under Final Tax Regime. The charge for current tax also includes adjustments where necessary, relating to prior years which arise from assessments framed / finalised during the period.

Deferred

Deferred taxation is recognised using the balance sheet liability method on all major temporary differences arising between the carrying amounts for financial reporting purposes and the amounts used for taxation purposes. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that the temporary differences will reverse in the future and taxable income will be available against which the temporary differences can be utilised. Deferred tax assets and liabilities are measured using the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

4.7 Financial instruments

4.7.1 Financial assets

4.7.1.1 Classification

Management determines the appropriate classification of its financial assets in accordance with the requirements of International Accounting Standard 39 (IAS 39), "Financial Instruments: Recognition and Measurement" at the time of purchase of financial assets. The financial assets of the Company are categorized as follows:

a) Financial assets at fair value through profit or loss

A financial asset is classified as at fair value through profit or loss if it is classified as held for trading or is designated as such on initial recognition. Financial assets that are acquired principally for the purpose of generating profit from short-term fluctuations in prices are classified as 'held for trading'.

b) Loans and receivables

These are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

c) Held-to-maturity

These are financial assets with fixed or determinable payments and fixed maturity which the Company has the positive intent and ability to hold to maturity.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

d) Available-for-sale financial assets

Available for sale financial instruments are those non-derivative financial assets that are designated as available for sale or are not classified either as (a) financial assets at fair value through profit or loss (b) loans and receivables (c) held to maturity. Financial assets intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in equity prices, are classified as 'available for sale'.

4.7.1.2 Initial recognition and measurement

All financial assets are recognised at the time the Company becomes a party to the contractual provisions of the instrument. Financial assets are initially recognised at fair value plus transaction costs except for financial assets carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs associated with these financial assets are taken directly to the profit and loss account.

4.7.1.3 Subsequent measurement

Subsequent to initial recognition, financial assets are valued as follows:

a) 'Financial asset at fair value through profit or loss' and 'available-for-sale'

'Financial assets at fair value through profit or loss' are marked to market using the closing market rates and are carried on the balance sheet at fair value. Net gains and losses arising on changes in fair values of these financial assets are taken to the profit and loss account in the period in which these arise.

'Available-for-sale' financial assets are marked to market using the closing market rates and are carried on the balance sheet at fair value. Net gains and losses arising on changes in fair values of these financial assets are recognised in other comprehensive income.

b) 'Loans and receivables' and 'held-to-maturity'

'Loans and receivables' and 'held-to-maturity' financial assets are carried at amortised cost.

4.7.1.4 Impairment

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired. A significant or prolonged decline in the fair value of a equity securities below its cost is also an objective evidence of impairment. Provision for impairment in the value of financial assets, if any, is taken to the profit and loss account.

4.7.1.5 Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the financial statements when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liabilities simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in normal course of business and in the event of default, insolvency or winding up of the Company or the counterparties.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4.7.2 Financial liabilities

All financial liabilities are recognised at the time when the Company becomes a party to the contractual provisions of the instrument.

4.7.3 Derecognition

Financial assets are derecognised at the time when the Company's contractual right to the cashflows from the asset expires or it transfers the right to receive the contractual cashflows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control the transferred asset. Financial liabilities are derecognised at the time when they are extinguished i.e. when the obligation specified in the contract is discharged, cancelled, or expires. Any gain or loss on derecognition of financial assets and financial liabilities is taken to the profit and loss account.

4.7.4 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The fair value for financial instruments traded in active markets at the reporting date is based on their quoted price, without any deduction for transaction costs.

For all other financial instruments not traded in an active market, the fair value is determined by using valuation techniques deemed to be appropriate in the circumstances. Valuation techniques include the market approach (i.e., using recent arm's length market transactions adjusted as necessary and reference to the current market value of another instrument that is substantially the same) and the income approach (i.e., discounted cash flow analysis making as much use of available and supportable market data as possible).

All assets and liabilities for which fair value is measured or disclosed in these financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value

Level 1: Quoted prices (unadjusted) in active markets for identical asset

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change occurs.

4.8 Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents include cash in hand, cash in transit, cheques and drafts in hand and in transit, balances held with banks in current accounts, short term highly liquid investments that are readily convertible to known amount of cash with insignificant risk of change in value having maturity of three months or less from the date of acquisition and short-term running finances that are repayable on demand and form an integral part of Company's cash management. Short-term running finances are shown within short-term borrowings in current liabilities on the balance sheet.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4.9 Trade and other payables

Liability for trade and other payables are carried at cost, which is the fair value of consideration to be paid in the future for goods and services whether or not billed to the Company.

4.10 Staff benefits

4.10.1 Retirement benefits

The Company operates:

- a) an approved contributory provident fund for all eligible employees; and
- b) an approved gratuity fund for all employees. Annual contributions are made to the fund on the basis of actuarial recommendations. The actuarial valuations are carried out using the Projected Unit Credit Method. Remeasurements which comprise actuarial gains and losses and the return on plan assets (excluding interest) are recognized immediately in other comprehensive income. The Company determines the net interest expense (income) on the net defined benefit liability / (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the actual period to the then - net defined benefit liability / (asset) during the period as a result of contribution and benefit payments. Net interest expense and current service cost are recognized in the profit and loss account. The latest actuarial valuation was conducted at the balance sheet date by the Archroma group's globally appointed actuary.

Staff retirement benefits are payable to staff on completion of prescribed qualifying period of service under these schemes.

- c) The Company's net obligation in respect of other long-term employee benefits [i.e. long service award (Jubilee Plan)], other than defined benefit obligation, is the amount of future benefit that employees have earned in return for their services in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit and loss account in the period in which they arise.

4.10.2 Compensated absences

The liability in respect of compensated absences of employees on unavailed leave balances is accounted for in the period in which the leave is earned.

4.11 Foreign currency transactions

Transactions in foreign currencies are translated to Pakistani Rupees at the foreign exchange rates prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are translated into Rupees at the rates of exchange approximating those at the balance sheet date. Exchange gains / losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are taken to the profit and loss account.

4.12 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

4.13 Proposed dividend and transfer between reserves

Dividends declared and transfers between reserves made subsequent to the balance sheet date are considered as non-adjusting events and are recognised in the financial statements in the period in which such dividends are declared / transfers are made.

4.14 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefit will flow to the Company and the revenue can be measured reliably. Revenue is measured at the fair value of consideration received or receivable on the following basis:

- Sales are recognised as revenue when goods are delivered and invoiced.
- Indenting commission is recognised on receipt of shipment confirmation from suppliers.
- Interest income is accrued on a time apportion basis on the principal outstanding at the rates applicable.
- Miscellaneous income is recognized on receipt basis.

4.15 Expenses

All expenses are recognized in the profit and loss account on accrual basis.

4.16 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the Company. All other leases are classified as operating leases including leases under ijarah financing.

Lease payments under finance lease are apportioned between finance costs and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance costs are recognized in the profit and loss account, unless they are directly attributable to qualifying assets, in which case they are capitalized. Payments made under operating leases and ijarah financing (net of any incentives received from the lessor) are charged to profit and loss account on straight line basis over the period of the lease / ijarah term.

4.17 Segment reporting

Operating segments are determined and presented in a manner consistent with the internal reporting provided to the chief operating decision-maker. The Chief Executive Officer has been identified as the chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments.

An operating segment is a component of the company that engages in business activities from which it may earn revenues and incur expenses, including revenue and expenses that relate to transactions with any of the Company's other components.

The Company has determined operating segments using business units. The business units have been established on the basis of products offered to external customers. The Company's Chief Executive Officer reviews the financial performance of the Company by business units.

21. CONTINGENCIES AND COMMITMENTS

21.1 Contingencies

21.1.1 Octroi levies amounting to Rs. 31.319 million are in dispute with a contractor. A petition has been filed by the Company in the Court challenging the above levies which was decided in favor of the Company during the year ended 31 December 2012. However, an appeal has been filed by the counter party which is pending for hearing. As management is confident that the decision will be in favour of the Company, no provision has been made in these financial statements in respect of the aforesaid amount.

21.1.2 During the year ended 31 December 2007, damages and compensation case was filed in the Civil Court, Lahore against the Company and one of its affiliates for claim of USD 148,509 and Rs. 41.1 million on account of short supplies and late shipment. The Company acted as an indenting agent for this supply. Management is confident that the matter will be decided in favour of the Company and it will not be exposed to any loss on account of this claim. Accordingly, no provision has been made in these financial statements in respect of this claim.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

21.1.3 During the year ended 31 December 2009, the Company had received notices from the sales tax authorities demanding payment of Rs 233.424 million on account of sales tax along with the default surcharges on supply of the products to its customers as zero rated by the Company from June 2007 to June 2009. The Company has filed a case in the High Court of Sindh against which the Court has issued restrained orders to the authorities from proceeding matter till the decision of the suit. Management is confident, based on the legal advice, that the matter will be decided in favour of the Company as the zero rating status of the supplies is available in view of S.R.O. 163(1)/2011 dated 2 March 2011. Accordingly, management is of the opinion that the Company will not be exposed to any loss on account of this action. Therefore, no provision has been made in these financial statements in this respect.

21.1.4 During the year ended 2015, the Government of Pakistan passed a new law "Gas Infrastructure Development Cess Act 2015", by virtue of which all prior enactments have been declared infructuous. The said Act levies GIDC at Rs. 200/MMBTU on captive power consumption effective 1 July 2011 and at Rs. 100/MMBTU on industrial connection from the date of passing that Act. Certain companies have obtained a stay order on the retrospective application of the Act from The Honourable High Court of Sindh and also contesting the case. In view of uncertainties regarding applicability of the Act retrospectively, management has therefore not recognised provision approximately amounting to Rs. 48.73 million, pertaining to period from 1 July 2011 to 30 September 2014, in these financial statements with respect to captive power plant installed at Jamshoro.

26. STAFF RETIREMENT BENEFIT

26.1 Defined benefit plan - approved gratuity fund

26.1.1 Salient features

The Company offers an approved gratuity fund for all eligible employees. Annual contributions are made to the fund on the basis of actuarial recommendations. The gratuity is governed under the Trusts Act, 1882, Trust Deed and Rules of Fund, the Income Tax Ordinance, 2001 and the Income Tax Rules, 2002.

The Company faces the following risks on account of gratuity fund:

Final salary risks

The risk that the final salary at the time of cessation of service is greater than what was assumed. Since the benefit is calculated on the final salary, the benefit amount would also increase proportionately.

Asset volatility

Most assets are invested in risk free investments. However, investments in mutual fund units and term finance certificates are subject to adverse fluctuation as a result of change in market price.

Discount rate fluctuation

The plan liabilities are calculated using a discount rate set with reference to corporate bond yields. A decrease in corporate bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the current plan's bond holdings.

Investment risks

The risk of the investment underperforming and not being sufficient to meet the liabilities. The risk is mitigated by closely monitoring the performance of investment.

Risk of insufficiency of assets

This is managed by making regular contribution to the Fund as advised by the actuary.

26.1.2 Valuation results

Actuarial valuation is carried out every year and the latest valuation was carried out as at 30 September 2016 by the Archroma Group on global basis. NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

26.1.8 Actual return on plan assets during the year was Rs. 56.40 million (30 September 2015: Rs. 151.66 million).

26.1.9 Sensitivity analysis

The impact of 0.5% change in following variables on defined benefit obligation is as follows:

Change in assumption	2016	
	Percentage change	Increase / decrease in assumption
	Percentage (%)	(Rupees in '000)
Increase by 50 basis points	Discount rate + 0.5%	981,258
Decrease by 50 basis points	Discount rate - 0.5%	922,983

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant assumptions, same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability.

The comparative figures of sensitivity analysis are as follows:

Change in assumption	2015	
	Percentage (%)	Increase / decrease in assumption (Rupees in '000)
Discount rate	0.5%	45,893

26.1.10 The weighted average duration of the defined benefit obligation is 15 years.

26.1.11 Plan assets comprise of the following:

	30 September 2016 (Rs '000) (Un-audited)	30 September 2016 Percentage composition	30 September 2015 (Rs '000) (Audited)	30 September 2015 Percentage composition
Term finance certificates / Sukuk certificates	56,141	7.25%	69,398	8.43%
Investments in units of mutual funds	626,822	80.90%	668,594	81.21%
Balances with banks	9,842	1.27%	8,331	1.01%
Government debt securities	81,994	10.58%	76,938	9.35%
	774,799	100.00%	823,261	100.00%

26.1.12 As per the actuarial recommendations, the expected return on plan assets was taken as 7% (2015:13%), which is representative of yields on long-term Government bonds. Due to the increased volatility of share prices in recent months, there is no clear indication of return on equity. It is therefore assumed that the yield on equity matches the return on debt.

26.1.13 Based on actuarial advice, the Company intends to charge an amount of Rs 52.983 million in the financial statements for the year ending 30 September 2017.

41. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's activities are exposed to a variety of financial risks namely credit risk, foreign exchange risk, interest rate risk and liquidity risk. The Company is not exposed to any price risk as it does not hold any investments exposed to price risk. The Company has established adequate procedures to manage each of these risks as explained below:

41.1 Credit risk and concentration of credit risk

Credit risk is the risk which arises with the possibility that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The Company attempts to control credit risk by monitoring credit exposures, limiting transactions with specific counterparties and continually assessing the creditworthiness of counterparties.

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

Credit risk arises from bank balances, cheques in hand, deposits and credit exposures to customers, including trade debts and other receivables. Out of the total financial assets of Rs. 3,180.498 million (2015: Rs 3,287.620 million), the financial assets that are subject to credit risk amounted to Rs 2,931.47 million (2015: Rs 3,283.58 million).

The total bank balance of Rs. 65.723 million (2015: Rs 44.771 million) have been placed with banks having short-term credit rating ranging from A1+ to A-2. Due to the Company's long standing business relationships with these counterparties and after giving due consideration to their strong financial standing, management does not expect non-performance by these counterparties on their obligations to the Company. 83% of cheques in hand reported on balance sheet have been subsequently cleared.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

Deposits are provided to counterparties as security for continued provision of services to the Company. Management does not expect to incur material losses as such amounts are provided based on agreement with counterparties and are refundable upon termination of related services.

Management does not expect to incur losses in other receivable and loans as significant amount in other receivable is due from related parties and also loans to employees which are secured against provident fund balance of respective employees.

The most significant financial asset exposed to credit risk is the trade debts of the Company. For trade debts, individual credit limits are assigned to customers based on the recommendations from respective business unit heads keeping in view their payment history, financial position, past experience and other factors. The utilisation of credit limits is regularly monitored. The concentration of credit risk lies in the top 5 (2015: 5) customers which constitute 47.09% (2015: 44.56%) of the Company's trade debts.

The breakup of amount due from customers other than related parties as disclosed in note 9 to these financial statements is presented below:

	30 September 2016 (Rs '000)	30 September 2015 (Rs '000)

41.2 Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 September 2016

At 30 September 2016, if the Pakistani Rupee had weakened / strengthened by 1% against the US Dollar, Euro and Swiss Franc with all other variables held constant, profit before taxation for the year would have been higher / lower by Rs. 9.92 million (30 September 2015: Rs 263.64 million). The sensitivity analysis is not actual indicator of impact owing to future fluctuation in exchange rate. The analysis is performed on the same basis for 2015.

41.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The majority of the interest rate exposure arises from short and long term borrowings from banks.

At the balance sheet date, the interest rate profile of the Company's interest-bearing financial instrument is:

	Carrying amount 30 September 2016 (Rs '000)	Carrying amount 31 September 2015 (Rs '000)
Fixed rate instruments		
Financial liabilities	-	435,000
Variable rate instruments		
Financial liabilities	675,770	1,749,491

Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets and liabilities at 'fair value through profit or loss account'. Therefore a change in interest rates at the reporting date would not affect the profit and loss account.

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased / (decreased) equity and the profit by Rs. 4.66 million (2015: Rs. 11.90 million) with the corresponding effect on the carrying amount of the liability. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis as for 2015. The sensitivity analysis is not actual indicator of impact owing to future interest rate.

41.4 Capital risk management
